Reminder: The Quarterly Pharmacy Changes are published as articles in two parts. This part-2 article is a continuation of the [July Quarterly Pharmacy Changes Part 1](#), which included changes that required member notification - drug list revisions/exclusions, dispensing limits, utilization management changes and general information on pharmacy benefit program updates. This article contains coverage additions, utilization management updates and any other pharmacy program updates.

Drug List Changes

Based on the availability of new prescription medications and Prime’s National Pharmacy and Therapeutics Committee’s review of changes in the pharmaceuticals market, some additions (new to coverage) and/or some coverage tier changes (drugs moved to a lower out-of-pocket payment level) will be made to the drug lists for Blue Cross and Blue Shield of Illinois. Additions effective July 1, 2024, and prior updates are outlined below.

Utilization Management Program Changes

Utilization Management programs are implemented to regularly review the appropriateness of medications within drug-therapy programs, and as a result, may adjust dispensing limits, prior authorization or step-therapy requirements. The following drug programs reflect those changes.

Dispensing Limit Changes

BCBSIL's prescription drug benefit program includes coverage limits on certain medications and drug categories. Dispensing limits, or quantity limits (QLs), are based on U.S. Food and Drug Administration approved dosage regimens and product labeling.

New dispensing limits and effective dates are listed on the chart below.

Basic Annual, Basic Multi-Tier Annual, Enhanced Annual, Enhanced Multi-Tier Annual, Performance Annual, Health Insurance Marketplace Drug Lists

Clinical Program	Medication(s) ¹	New Dispensing Limit	Effective Date

**These programs were previously reported as additions to only the open drug lists. However, a clinical decision has since added these programs to all drug lists. Members will not be lettered because drugs are new to market and there is no utilization to date.*

Program Retirements

The following standard utilization management program has been retired on the date indicated below.

- Human Fibrinogen Concentrate PAQL was retired April 15, 2024.
This program included the following medications: Fibryga and RiaSTAP

Please Note: The prior authorization programs for standard pharmacy benefit plans correlate to a member's drug list. Not all standard PA programs may apply, based on the member's current drug list. A list of PA programs per drug list is posted on the member pharmacy programs section of bcbsil.com.

If your patients have any questions about their pharmacy benefits, please advise them to contact the number on their member ID card. Members may also visit bcbsil.com and log in to Blue Access for MembersSM or MyPrime.com for a variety of online resources.

Change in Benefit Coverage for Select High-Cost Products

Several high-cost products with available lower-cost alternatives will be excluded on the pharmacy benefit for select drug lists. This change impacts members who have prescription-drug benefits administered by Prime Therapeutics[†]. This change is part of an ongoing effort to ensure our members and employer groups have access to safe, cost-effective medications.

Please note: Members were not notified of this change because either there is no utilization, or the pharmacist can easily fill a member's prescription with the equivalent without needing a new prescription from the doctor.

The following drugs are excluded on select drug lists.

Product(s) No Longer Covered ¹	Condition	Covered Alternative(s) ^{1,2}
AMCINONIDE cream 0.1%	eczema, dermatitis, allergies, rash	Lower cost, high potency steroids (e.g., Betamethasone cream/ointment, Fluocinonide)
